

BODUM TRAVEL PRESS

MARCH 23, 2011

One of my little pet peeves is drinking cold coffee - and at the moment my coffee gets cold very, very often! Between getting kids out of bed, dressed, to the breakfast table, into coats and out of the door, my sacred cup of coffee (strong, with a drop of milk, no sugar) gets put down on a shelf somewhere. By the time I find it again, it is stone cold.

I have recently invested in a [Bodum Travel Press](#). So far it has been a success story. It is super easy to use and my coffee stays warm for at least 2 hours. It might be a small step for mankind, but it is certainly a big step for me!
