

BIG FISH EATS LITTLE FISH

JANUARY 23, 2012

This is another art project inspired by an image I saw on [Pinterest!](#) I knew the minute I saw it that my kids would love this one. Plus, it's so easy! All you need are some clothespins, some card stock or thicker paper, some crayons or paint to decorate your fish, and scissors and glue. A fun project for kids of all ages - even our 2-year-old enjoyed making her fish (we drew a fish template and she coloured it in).

Also, if you're looking for more craft projects, you can take a peek at our [Crafts for Kids](#) Pinterest board for ideas!
