

PAPER CITY PARIS

FEBRUARY 17, 2012

I love living in Paris - it is beautiful, full of life and love and so much fun to explore. If you don't happen to live in Paris, have a look at the downloadable [Paris Paper City](#), from one of my top favorite children's craft blogs [Made By Joel](#). Just download the PDFs and you too can start exploring Paris, even if you live on the other side of the world. Have an explore around the Eiffel Tower, the Arc de Triomphe and a local boulangerie. There is even the sweetest little downloadable Citroën to drive around your city.

Such a fun way to introduce the city of lights to your kids. I love the fact that Joel has, very thoughtfully, included a brief description of all the buildings onto his PDFs, so this game can be educational too.
