## GIANT BALLOONS

FEBRUARY 27, 2012

I discovered [these](#) giant balloons on [My Little Day](#) and now cannot wait for one of my kid's birthday parties to come up. I think they are so cool. They get up to 90 cm big and still are as light as a feather - so much fun to throw around and play with!

I also love another idea the clever ladies from [My Little Day](#) have: why not fill up one of these balloons with toys and bonbons before you blow it up and use it as a [piñata](#)? The balloons do come with a good piece of advice: incredible lungs or a balloon pump are strongly recommended, if not you might get a little bit tired of blowing these things up... they need a lot of air
