

GREAT WOODEN TOYS FROM EPLOOF!

OCTOBER 29, 2012

ePloof! is a new Singapore-based children's shop which brings together great toys & home accessories from both Europe and Asia. I was thrilled to be introduced to the Japanese brand, [Mastro Geppetto](#), which makes this beautiful, boxed [animal set](#). The wooden animals are made of water-resistant yellow cedar wood, and are actually meant to be a *bath toy*! When wet, the little animals stick to the side of the bath, or float like other bath toys. You can also just stack them up or play with them like regular toys when not in the bath. Isn't that clever?

ePloof! was started by two friends in Singapore who have set out to find beautiful, exceptional quality products from around the world. From what they've found and stocked already, I can tell this is definitely a shop to keep an eye on. I love discovering new toy brands!
