100% Organic Cotton

PLAY. MOVE. LEARN

It's starting to get cold here in Montreal and so going out to play for hours is a thing of the past! I don't know about you, but my son needs to move, run and jump and with the winter months ahead that isn't always possible; I always thought he could use a punching bag to get all that budding up energy out. So you can't imagine how pleased I was to discover these [Eco-Bonk bop bags](#) and for so many reasons! These aren't your typical inflatable bop bags, not only do they provide all the fun in the world by pushing them and having them bounce back, but they happen to be sustainable as well. The covers are removable and made from 100% organic Cotton, as well as being printed with water-based inks. The inside is made from biodegradable Vinyl, all made in the USA and a percentage of the proceeds will go towards supporting the Wildlife Alliance. Seriously, does it get any better? You can be reassured you kids are playing with a safe toy for them and the environment. So which is your favorite character? I think mine is [Abigail the elephant](#).

There is a lot more information on the website and the Eco-Bonks can be bought online through the [website](#) as well. It's always nice to support small family business and I was lucky enough to meet Donna, the co-founder and brains behind Eco-Bonk at the NYC gift show, it was such a pleasure talking to her and seeing the passion she had for the product. I just know my kids would love these and they are the top of my gift list this year.
