

## BABIES LOVE TO SKWISH!

MARCH 15, 2013

I was speaking to Esther the other day about baby toys and we both agreed that the [Skwish toy](#) might just be the best baby toy on the market. And if our babies could talk, they would certainly agree with us! Marlow's eyes light up at the sight of it, and she kicks her little legs with excitement! (She also loves to gnaw on the wooden balls as pictured above.)

Esther blogged about this toy many years ago [here](#) (she raves about its brilliant design and engineering prowess!), but I just thought it was worth mentioning again considering how much both of our babies love it. The Skwish toy is available from Amazon ([US](#) and [UK](#)).
