

## LITTLE SUITCASE BY MIMILOU

MARCH 25, 2013

How cute are these little suitcases by [Mimilou](#)? In our home, little suitcases to store treasures are a very valuable commodity. Every night when I do the last round of picking up all the miscellaneous items left around the flat after a good days playing, I find little suitcases filled with little bits and pieces.

Now, I don't know if it is only my kids, but the love these girls have for putting random stuff in a bag is immense. You can find little pictures they have drawn, mixed in with a broken doll leg, a little fluffy toy and some little books. It makes no sense to a grown-up, but to my kids these are real treasures. So I have decided to go with the flow (within limits of course). I've just decided we need pretty little suitcases for them to fill up. At least that helps me ignore the chaos inside.
