

STICKERS EVERYWHERE

JULY 18, 2008

Sometime the simplest things are best. What has turned out the be the

best thing to keep my 2-year-old busy in trains, planes and automobiles? Stickers!! I would never in a million years have thought of it, but my friend Katja handed me a whole book full of Peppa Pig stickers for a car journey recently, and I have never seen a little person spend so much time looking at something -contemplating what to do with it, where exactly to put it, delicately placing it, deciding that it was the wrong place to place it, then take it off and start all over again. You might spend a few minutes after you arrive at your destination un-sticking stickers from windows and chairs, but it will provide hours of fun for your kids, and sanity for the rest of the family!
