

DONNA HAY KID'S MAGAZINE

JANUARY 4, 2011

I think the time has come to introduce my party bible! It is none other than the superb [Donna Hay Kid's magazine](#)! What a treat! Eye-candy from the first to the last page; the photography is so stunning. Choc-full of children's party themes, recipes and ideas, it all *appears* so effortlessly stylish. I particularly love Donna's tips on how to make cakes look half way reasonable with her 'cheats guide' to birthday cakes. (Truth be told, my super sombrero cake for our mexican fiesta still flopped even after following it to the letter, but for general folk, this shouldn't happen!)

The brilliance of domestic goddess [Donna Hay](#) is widely recognized in Australia. Her cookbooks and magazines are legendary here and would, I am guessing, grace the book shelves of a great many Aussie homes. I can never wait for the next edition of the party

issue to roll by (it's a whole 12 months between editions but hey...I am very patient). Incidentally, Donna recently launched her [new website](#). There are some irresistible party and entertaining ideas in her [online store](#), as well as all current and past issues of her cookbooks and magazines. So, if you love to throw a party... or even dread it, I urge you to have a look!
