

IS THAT A NAPPY BAG? YES, IT IS!

APRIL 8, 2011

Beautiful, this nappy bag by new company **Rubizu**! Rubizu is formed by two sisters Roba and Azza and together they design and produce a series of exquisite nappy bags that are not only beautiful and luxurious but also very practical indeed. It works as follows: the pretty turquoise insert pops out completely. The 'empty' bag can be used independently from the interior compartment as it has its own side pockets and is beautiful as is. The interior compartment can be easily organised once out of the bag. Very soon, a laptop insert will be available too which transforms the bag from mummy bag to business bag in a few seconds! (I'm particularly excited about this feature because my laptop bag is such an embarrassment - I think my husband got it for free at a conference about 15 years ago. It's gross.) All in all, these **Rubizu** bags are pretty amazing. For available styles and more info on the functionality, check the **Rubizu website**. The pretty leather bag featured here is available through **Blossom Mother and Child**.
