

EASTER CRAFT: HEN EGG CUPS

APRIL 6, 2015

Easter holidays are here and I've prepared a new Easter craft for you. This one I absolutely love because it's so very simple that even very young children can make it, and it takes very little time to finish so it's also perfect for those types of kids that can't stay still for very long, like my Tila. She loved this craft and has even made one for her (boy)friend from school! (Also, it's a great way to make use of all the left-over Easter eggs.)

Things you need are:

- Egg carton (you can only make 2 chicks from one carton)
- Orange and Red Crafting Paper
- Feathers (I used white and yellow)
- Wiggle Eyes (or black paint)
- Scissors
- Crafting Knife
- Glue

1. Cut out the edge part of the egg carton like on the photo
2. Trim the excess around the upper edge
3. Take the red paper and cut a comb (or as we call it – the crown) and an orange beak (shape of rhombus, folded in half). Check the width of the top of your cardboard's peak for the comb first and then about a centimeter below the top for the beak. And make both a few mm narrower to leave a little room for the edges. Cut notches the notches to fit the comb and the peak
4. Put a little glue at the bottom of both pieces
5. Insert them into slots and either glue on wiggly eyes or draw them on.
6. Put a generous amount of glue on the inner side of the back part (where the should be) and glue feather on.

Now wait for it to dry and insert an egg! Give it away or not ?
